

HealthKit Practice Software

Ruth Turnbull Psychology uses HealthKit Practice Software if you wish to find out more about HealthKit please go to <https://www.healthkit.com/about-us>

"Privacy and Security"

Nothing is more important than your health. Providing you with the security to enable you to understand, track and manage your patients' or your own health is central to our service.

HealthKit is protected by bank-grade security and encryption, which means records, notes and other information are protected to the same level used in banks. All information is stored in a securely protected data centres with multiple backups in place.

HealthKit's practice management software has been designed with confidentiality and security in mind, right from the structure of patient profiles and clinical notes, through to the strict user access levels for different practitioners and administrator roles in your practice.

For patients and people everywhere, HealthKit conducts in-depth research to ensure practitioners using our software are appropriately accredited and credentialed. Our research forms the basis of our extensive searchable practitioner directory that we are continually expanding so that you can find the right practitioner for you.
